Certaine profitable Rules and briefe obseruations, concerning Husbandrie.

The best time to sow all kinde of Corne, is when the moone goeth her course in Cancer.

The best time to plant and Graft, when the moone is in a fixed signe, especially in Taurus, Aquarius, or in the increase of the moone, which is betweene the change and the full.

To set or sow all kind of seeds, the moone being well seated in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces.

Fell Timber to build withall, when the moone is towardes the last quarter, shee being then in Aquarius, or Pisces.

Crop trees and fell wood to burne, that the stocks may the better and sooner grow again, when the moon is in the first quarter.

Remoue and set young trees in the last quarter of the Moone, in Taurus or Capricornus, and that in the moneths of September, October, November, and February.

The best time to geld Cattell, the moon being in Aries, Sagittarius, or Capricornus.

The best time to cut Vines, is in February, or March, the moone increasing, in Taurus, Virgo, or Libra.

The best time to sheare sheep, is in the increasing of the moone, and that is from the change to the full.

To cut haire, that it may the sooner grow againe, the moone increasing, in Taurus Virgo, or Libra.

To muche your land, that the weedes may not growe thereby, is in the decreasing of the Moone, that is, from the full to the change.

Of the Eclipſes which ſhall happen this preſent yeare of our Lord God, 1619.

There ſhall appeare and be preſented vnto the view of the Inhabitants, (vpon this our Terreſtrial Globe) this yeare of our Lord God, 1619 fiue eclipſes of the two great Lights of heauen, three of the Sunne, and two of the Moone, whereof the three of the Sun ſhall not be apparant in our Horizon, and therefore I omit for to make any further relation of them.

Of the firſt Eclipſe of the Moone.

VPon the 16 day of June being Wednesday, there will ſenſibly and viſibly appeare in our Horizon, a ſmall Eclipſe of the Moone, 48 minuts after 11 of the cloche at night, ſhe being at that inſtant diametrally oppoſite to the Sun, and placed in the firſt face of Capricornus, in a ſigne of the partition of the earthly Triplicity, naturally cold and dry of complexion, melancholy, Feminine, Nocturnall, Moueable, Meridionall, the houſe of Saturne, and the exaltation of Mars. This lunary obſcuration doth continue from the beginning to the end one houre, and 29. minuts: the points or degrees eclipſed, is one and 28 minuts.

Of the ſecond Eclipſe of the Moone

There will be obſerued to our ſights, a great eclipſe of the Moone, on the 11 day of December, being Saterday, 32 minutes after two of the cloche in the morning, ſhe being then placed (neere Cauda Draconis) in a ſigne of the ayrie Triplicity, naturally hot and moiſt, of complexion ſanguine, maſculine of the day, occidentall & common, the houſe of Mercury, the exaltation of the head of the Dragon. This lunary obſcuration doth continue from the beginning to the end, three houres and 15 minutes: the points or degrees eclipſed, are 11 and 4 minutes. As concerning the effects of this eclipſe, I will referre it to the Author of all, that is aboue all, becauſe no Iudicials are any way preiudiciall to his Almighty god-

goodnesse, which hath as well plenty and store, as scarsity and dearth in his handes: wherefore we are humbly to solicite, and beseech him by vnfained & zealous prayer, to abridge his punishments, and extend his blessings towards vs, Amen.

Briefe Rules and necessary Obseruations, concerning Bleeding, Bathing, Purging, and Sweating, according to the motions of the Moone.

When the weather is either extremely hot or cold, it is not then conuenient, either to let blood or to purge, vnlesse some great necessity do require it: yet notwithstanding if this blood-letting be for the Phrenzie, the Apoplexie, for a continuall headach, proceeding of Choler or blood, or for any hot burning Feuer, or other extreme paine, a man in such a case may not tarry a chosen time, because the patient might miscarry in the meane season. But in this foresaid case of extremity, blood is not to be let in such quantity as otherwise it would, if a chosen time might conueniently be expected.

The best time to let the Phlegmatick blood, is when the Moone is in Aries, or Sagittarius, the head and thighes excepted.

For the Melancholly, the Moone being in Libra, or Aquarius, the buttocks and legs excepted.

For the Choleriche, the Moone being in Cancer, Scorpio, or Pisces, the breast and feete excepted.

For the Sanguine, al be good which before is named. In the spring time let blood at the right side. In harueste time let blood at the left side.

For Bathing.

Bathings are commonly vsed, rather for pleasure then for profite, especially where hot-houses are ouer-much haun-

hannted: but I minde not to speake of them in this place, otherwise then to advertise those that tender their owne health, to be wary and circumspect in reso:ting unto them without iust cause, & immediately after, or with such persons as be uncleane. Know that it is not good to bathe when the Moone is in earthly signes, as in Taurus, Virgo, or Capricornus: the reason is because they are of a colde and dry nature, and the nature of cold is to refraine and binde: and so the moone being in these signes, the pores of the body are closed and shut, so that there can be no resolution of humors and superfluities, which by bathing, ought to be avoyded.

But in fiery signes, as when the moone is in Aries, Leo, or Sagitarius, then it is a good time for Bathing, for then the body is apt to resolution, for it is the nature of heate to open and resolue.

It is best bathing two or three dayes after the change, and at the full of the moone: for then the superfluities are ripe, and ready to avoide and disposed to flowe and issue out. which indeed is the very end and vse of bathing. If any will enter into the Bath, onely for pleasure sake, let the moone be in Libra or Pisces.

Further, if bathing be vsed for health, let the party greeued, learne of the wise Physician, whether his sickenesse hath need of moystening, or drying: for if it doth require moystening, as in Pthisis, and such like, then let him bathe in watery signes, hauing good aspects of Iupiter and Venus. But if the sickenesse require drying, as in paralysis, and the like, then let him bathe, the moon being in fiery signes, hauing good aspects of Mars and the Sunne.

Also, before you enter into any Bath, your body must be purged: for if you go in vnprepared and vnpurged, peradventure you may be worse after, then before.

The best time of the yeare to bathe in, is the Spring and Harueſt and in them the monthes of May and September. The best time of the day to go into the Bath, is an houre after the Sun rising at the least, alwayes provided, that you must walke either an houre, or halfe an houre before, & haue a stoole either by nature or by art. Ye

must

muſt couer your heads well, ſo long as ye be in the bath and beware you drinke no cold drinke, although you be very thirſty, but forbeare all things that bee colde, leſt when ye are hot within, the cold ſtrike ſuddenly into ſome principall member, and ſo hurt you.

The time of tarrying in the bath, is commonly one houre, but it may be more or leſſe, according to the nature of the bath, or ſickneſſe of the party, at the diſcretion of the wiſe Phyſition.

For Purging.

In purging, theſe 5. things ought to be knowne

1. The humor which aboundeth.
2. The beſt way to auoid it.
3. The ſtrength of the perſon.
4. The manner of the ſickneſſe.
5. The force and nature of the medicine.

For when theſe things are not conſidered and obſerued, many perilous accidents may follow, and greatly grieue and hurt the body.

Good ſignes for purging generally, are cancer, ſcorpio, and pisces.

Particularly, as with potions or drinkes, in ſcorpio.

Purge with electuaries, the Moone being in Cancer.

Purge with pils, the Moone being in Pisces.

Take preparatiues, the moone in Gemini, Libra, or Aquarius.

Take vomits, the moone in Aries, Taurus, or Capricorne.

Take gargariſes, the moone in Aries, Cancer, or Capricorne.

Take glikters, the moone in Libra, or Scorpio.

To prouoke neezings, the moone in Cancer, Leo, or Libra.

To ſtoppe fluxes, rheumes, and laxes, the moon being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue attractiue, the moone in Aries, Leo, or Sagittarius.

Good to comfort the vertue digeſtiue, the moone in Gemini, Libra, or Aquarius.

Good

Good to comfort the vertue retentiue, the moone in Taurus, Virgo, or Capricorne.

Good to comfort the vertue expulsiue, the moone in Cancer, Scorpio, or Pisces.

For vsing of vnguents or plaisters, it is best applyed when the moone is in that signe which gouerneth the same member or part of ꝑ body, to which it is appliable.

For Sweatings.

Sweatings, as they are of two sorts, that is to say, naturall and artificiall, so they are vsed for two ends & purposes: the naturall sweate, if good heed be taken in opening the pores, will dissolue grosse and thicke humors, will cleanse the blood will comfort the spirits, will put away colds, will consume rawe humors, qualifie and quench raging feuers, will helpe numnesse & the dropsie. The artificiall sweate will cleanse scabs, put away itch, amend dulnesse in hearing, ease the stone, resolue congealed and cold melancholy blood and humors, &c. But for the better performing and effectuall working in these causes, the counsell of the learned Physitian is to be desired and vsed.

The best and meetest signes to sweat in, are Leo, Aries, and Sagittarius, and that two or three dayes after the Change, and at the full of the Moone. And note that sweatings is better to be done at the euening, then in the morning: for when the body hath nourishment within, the spirits shall not be drawne vtterly forth, to the extreme parts. Note further, that leane and dry folkes, or feeble persons must sweat little, for it will hurt thē much: but fat folkes may sweat well, & it will helpe thē much.

¶ A Description of the foure quarters of this yeare of our Lord God, 1619.

Of Winter.

WInter (which is the chiefe capitall foe of ꝑ Spring, the disgrace of Sommer, and the deepe deuourer

of

of the fruitfull Harueſt) began to take his effects (according to our vſuall computation) the 12. of December, in the yeare afore-going, at the firſt entring of the Sun into the firſt minute of the ſigne Capricornus, at which time, the Sun ſhall be at his greateſt ſouth declination from the equinoctiall line, ſo that he riſeth ſouth-eaſt, and ſetteth ſouth-weſt. Now is the hiemall or Winter ſolſtice, for the Sun is ſo farre removed from our Zenith or verticall point, that he cannot decline any further, and ſtands at a ſtop and ſtay, and then is the ſhorteſt day in all the yeare, & longeſt night: and ſo this quarter doth continue vnto the 11. of March next enſuing.

Touching the inclination and diſpoſition of the Weather for this quarter, I gather that it will not vary much from the naturall quality, eſpecially for colde windes & boiſterous ſtormes, noiſome and hurtfull to men & cattel, &c. This ſeaſon is by nature cold and moiſt, vnpleaſant for trauellers, eyther by land or ſea, and vnto aged perſons it is very combrous and noyſome, cauſing ſuperfluity of rawneſſe, and abundance of cold moiſtneſſe to ouerflow their bodies, to their great trouble & diſquietnes, &c.

Of the Spring.

THe Sun (which is the eye of the World, the fountain of light, and the cheefe moderatour of all the reſt of the lights) hath like a Gyant run his race, and finiſhed his reuolution, (Gradatim) throughout the 12. ſignes, and now beginneth his iourny afreſh againe, and goeth an eeuen courſe, and ſo becomes an indifferent arbiter betweene the day & night, and maketh an equality throughout his whole gouernment to the great ioy and comfort of all his reuiued ſubiects. chearing with his ſplendant countenance, the poore afflicted weather-worne wordes of this our darke ſtarre of mortality, (which the darkned countenance of Winters extremity, had almoſt ſubdued) with his moſt excellent preſence, whereat Yearth begins to ſmile, and to put on her new apparell, the flouriſhing liuery of freſh Flora, whoſe liberall proceedings will not be much hindered with any extraordinary diſtemperature, but rather continue in ſome reaſonable con-

dition,

dition, little disagreeing from the naturall quality, to the ioy and comfort of all sorts of budding, blooming, and sprouting things.

This season is naturally hot and moist, the most temperate time of the yeare, and least harder of sickenes that doth procure death, & a very conuenient time to remedy diseases gotten before, if men vse the councell of the learned. Such therefore as be diseased, let them not neglect this time.

Of Summer.

SUmmer, the third part of our vulgar yeare, according to our vsuall computation, beginneth now when the Sun hath mounted in his motion to the highest point of his course, namely to the first degree of the estiuall solstice Cancer, which is his greatest declination to the North from the equinoctiall line: and then is the longest day and shortest night with vs in the yeare, at which time beginneth our summer season, which is this yeare vpon the 12. of June, which quarter doth endure till the Sun hath gone through these summer signes, Cancer, Leo, and Virgo, from the first day, whereof the daies continually decrease by little and little, euen to the contrary Solstice, Capricorne described before in the winter quarter.

This season according to his proper nature is hot & dry, resembling the Element of fire, and complexion of choller, bringing all fruites to their ripenesse, cattell to their fatnesse and men to their wealth.

Concerning the state and condition of the season, it is likely to be vnconstant, and somewhat differing from the naturall quality.

Of the last quarter called Autumne.

AUtumne, the fourth part of the yeare Astronomicall, taketh his beginning at the Sunnes departure from the last scruple of Virgo, into the first minute of the second equinoctiall signe Libra, which will be this yeare on the 13 of September, the day and the night being of

an

an equall length, as in the Spring: but the ſeaſons are farre vnlike in qualitie, for this time is of it ſelfe vnconſtant and variable, warme in the day time, and cold in the night.

Touching the particular inclination of this quarter, I do coniecture that it will be ſubiect to lofty windes & ſtormes vnconſtant for trauellers either by land or ſea.

This quarter becauſe of the inequality of temperature, may as Hippocrates ſaith, be called the Mother or nurſſe of deadly ſickneſſes And Galen ſaith, that this time is moſt perillous: for whatſoeuer hath beene euill in the ſeaſons before and becauſe of the euill of the ayre in the hot Summer, it will giue great force to the peſtilence or peſtidentiall Feuer.

¶ *A declaration of the inclination and diſpoſition* of the weather and winds, according to the diuers motions and influences of the Erraticall & fixed ſtars: with the day, houre, and minute of the change of the Moone, her full, & quarters: and alſo of the riſing and ſetting of the Sun, in euery ſeauenth day of euery month of this yeare of our Lord God, 1619.

Ianu-

Ianuaries Abstract.

In this Month of January let not blood, neither ble but little Phisicke, except necessity constraine thee, and beware of taking cold, for in this month, Rheumes and Flegme do much increase, to fast long is hurtfull, but to drinke White-wine fasting is good and wholesome, ble meates and drinks that are naturally hot moderately, and weare warme cloathes.

In worldly businesse this month you may set all kind of common fruit-trees, as Pears, Plums, Cherries, Filberds, Walnuts, and such like. Haw-thornes, and all sorts of quicke-sets, trees, or Plants, are fittest to be set, generally from the change to the first quarter.

Take away the Mosse and superfluous branches from your trees, & this month it is good to set Beanes, pease, Parsneps Radish, Lekes, Garlike, Turneps, and Onions, if the weather be milde, and the moone past her ful. You may begin to Graffe at the ende of this month, so as the moone be increasing in her light.

Good husbands also this month, crop their Trees, fell Timber, and geld their Cattell, such as must be gelded, the state of the moone alwaies considered.

First quarter the 11. day, 57 minutes after high noone, boisterous and ruffeling windes.

Full Moone the 18 day, 13 minutes after a 11 of the clocke in the forenoone, ouer-casting clouds.

Last quarter the 26. day, 37. minuts after 8. of the clocke in the forenoone, answerable to the season.

Febru-

Februaries Abstract.

In this Moneth of Februarie, all slimy Fish, Milke, or Rice, and such like, that do oppilate or stop the Liuer and veines, or thicken the blood, are to be eschewed as enemies to health: also yet forbeare Phisicke and letting of blood, except great necessity do constraine it, and learned counsell do aduise it. Beware of taking cold, for now are Agues apt to be taken, and it is very ill to take heats, and afterwards sodaine cold vpon them.

In this month, is the most apteſt time to graft, to plant, and to set all kind of trees and bushes, the winde & weather, and age of the moone afore-hand considered. Peale, Beanes, Hastings, Onions, Parsneps, and such like, as in Januarie, may very fitly bee set in the wane of the Moone. The time is now to trim vp Gardens, to set and sow all kindes of Kitchen hearbs, to set slips, and to sow Kernels, to sow Mustardseed and Dates to set hops and Vines, and to cut and pruine them, and to sticke vp your rounciuall Pease and Hastings.

Full Moone the 20 day, 43 minutes after one of the clocke in the morning, some fall of moisture.

Last quarter the 28 day, 40 minuts after 3 of the clock in the morning apt for the time.

Marches Abstract.

In this Moneth of March, the humours of

mans

mans body begin to increase: and nowe grosse feeding breedeth grosse blood and grosse humors: and therefore vse meats of good digestion, & such as breed good iuyce. It is a good time to purge and clarifie the blood, by Potions, Bathings, and Blood-letting, or such other waies, as the learned Phisition shal appoint, and as the cause of the disease shal require. Now also sweet meats and drinkes are commendable.

The time of grafting as yet indureth, together with setting, sowing, proining, and plashing, of Vines, Hoppes, Potilowes, Dates, Kelke-peale, Onions, and Parsneps, and such like, &c.

Last quarter the 26. day, 13. minutes after 8 of the clocke at night, ouer-casting clouds for raine.

Aprils Abstract.

In this Month of Aprill, the Pores of men are opened, and are apt to receiue Phisicke: and they that now refuse the same, I commit them

to

to the benefite of Nature, for of all times of the yeere, this is the best time to preuent causes of sicknesses, or for speedy remedie in extreamities: for now nature her selfe doth renew strength through all the body. So where sickenesse happeneth, shee soone vnburdeneth by the meanes of Phisicke: wherefore what it cannot doe now, hereafter it will hardly be done, therefore take time whilst time is, &c.

As yet you may graft and proine Vines, also set Melons, Cowcumbers, Citrons, Artichokes, and pole vp Hops, sow Barley, Tanners apply themselues to Barking of trees, &c.

Last quarter the 26. day, 51. minuts after 9 of the clock in the forenoone, some fall of raine.

Mayes Abstract.

In this month of May rise early, for May doeth not loue any sluggards. And let such as be in health and able, walke into the fields, and to eate and drinke a little

bettimes

betimes is wholesome: abstain from al meats as be of a hot nature. And for such as be sick, it is a very good time to bee let blood, or to take Phisicke. Such as bee whole, God keepe them in health: and such as bee sicke, God send them good Phisitians and Phisicke.

The time is fitting now to sow Basill, Marierom, & such fine seedes, as before might not bee sowne, because of the coldnesse of the weather. Set Sage according to the prouerb, set Sage in May, and it will last alway. Sow flax and Hemp, set Hartichockes, weed your Hops and Gardens see to your Grafts, that no superfluous branches trouble them: May dew, Rosemary flowers, and Orant flowers, may at your pleasure be distilled this month, and now also haue a care of watching your Bees.

Julies Abſtract.

In this month of July, the cold heathes, and colde nights, ſtaine no great myrth, for feare of breeding of Agues and

Pestilence, chalaine, feuer, Phisicke and extreame exercise.

And now the Riuers are more wholesome then the Welles: but yet be you before you walke abroade, and take good heede of dirty gutters, and stinking lanes. In the time of any plague or pestilence keep your chamber windowes close shut, aswell all nights, as also in close, foggy, and moist dayes, opening them when the sun hath force of shining, and vse fire to perfume your Chambers euery morning, with Frankincense, or with Tarre and Frankincense, or with Tarre and Chafing-dish of Coales, then which nothing is more wholesome, saith Cardinus Benedictus, boyled and vsed after a fashion.

Now doth admonish slacke husbands to worke, and such as haue leisure, it is good to fallow for wheat, and to carry out dung, and to gather seeds and flowers to keepe at the yeare, and to dry the flowers in the shade, till they be almost dry, and then set them a while to the sun, that they mould not: and in like manner may you dis your hearbs.

Last quarter the 22. day, 4 minuts after 9. of the clock in the afternoone, windy and vnconstant.

New moone the 29. day, 15. minutes after 4. of the clock in the morning, somewhat stormy.

Augusts Abstract.

In August moderate diet is good Phisicke, for now it is very dangerous to surfeit: and take good heede of heates and then colds, for nothing sooner engendereth Plu-

plentifull. And bid not to sleep much, and especially after noone, for making oppilations, and for annoying of Agues, and the Headach, and Catharres. And let a man abstaine from phisick this moneth, except great necessity compell him.

Now Lady Ceres looses to have men enough to attend vpon her, and he that will not now be stir him to gather in wheat, is well worthy to eate browne Bread at Christmas. They that would have good sallets for their Gardens the next yeare, must now gather of their own, lest in buying abroad, they loose both their money, fruit, and labour. And such as desire to have Lettice, or other hearbes for winter, may commit seeds to the earth now in the increase of the Moone.

New Moone the 27. day, 15. minutes after 4. of the clocke at night, reasonable temperate.

September's Abstract.

In this month of September, such as have need may safely take Phisicke, and also may bath and bleede. In this month all things are in their proper vertue. And such fruits as are ripe, and not inieced, are good to eat, for such as have good stomacks.

The time is good to make conserues of Barberies and Quinces, winter hearbs must be now sowne, likewise is the time to set Artichokes, Rose-trees, Apples, Pears, Wardens, Strawberries, Violets, Willowflowers, Apricots

pels after the quarters at the full of the moon, sow Beets, Rapes and all the latter garden pease. Good husbandry is sowing Rie and Wheat, and good husbandry is thatching of Barnes, and plucking of Hemp, &c.

In November finish the Physicke that yee meane to take, and so rest till March, except some great necessitie compell thee: vse good meats and wholesome Wine to nourish thy blood, vpon thy warm clothing, and go dry of thy feet, or else make sure account of rheume & Pose, besides some other inconuenience that will ensue. Beware of the hot house this month, and vse Metony and Cinamon in drinke.

In the new of the Moone, you may remoove young trees as in the last month, and set Crab-tree stockes to graft vpon, when you please. It is also a good time in the waine of the moone, to set Peale, Beans, and if the weather be not too hard, it is good sowing of parsneps, good making of Malt, and killing of Beeues & Swine.

Decembers Abstract.

In this moneth of December, kepe thy body and head from cold and eate such meates as be of a hot quality, abstaine from physicke, and let thy kitchin be thy Apotecary, warme cloathing thy Marle, merry company thy kepers, and good hospitality thy exercise.

Remoue trees and bushes as aforesaid in November, if the weather proue not extreme. In the want of the Mowne, set Beans & Peale, and those herbes that cannot endure the cold, couer them with straw, or other prouision, from the frosts and snow. Finally thus ending the old yeare, let vs repent vs, and forsake our old sins, and leade new liues, all the daies of this miserable and transitory life, that in the ende we may be translated into euerlasting ioy and happinesse through Iesus Christ our Sauiour, who be praised for euer and euer, Amen.
